

Aesthipeel® — Aesthetic Microdermabrasion Unit

Easy to use and no clogging system

Sterile Disposables accessories

Patented 45° V shaped light handpiece

Very light delivery system

Patented Disposable sealed waste bottle

Power adjustment features

Suitable for:

Facial and body peeling

Ageing skins

Dull, congested and dry skin

Enlarged pores

Superficial rhythides

Minor Scars

Localized Hyper pigmentation

The Aesthipeel® Microdermoabrasion System is an equipment developed for aesthetic procedures. The device, manufactured by MATTIOLI ENGINEERING, is portable and a very reliable unit. Main applications foresees correction of skin abnormalities.

Aesthipeel® allows a progressive and controlled exfoliation of the skin.

Aesthipeel is a no clogging and completely disposable device. It uses the Mattioli Engineering patented 45 deg. V-shaped hand piece.

This specially engineered shape allows crystals to flow in a uniform and effective way, removing the skin in a very painless way.

Aesthipeel grants the users to work with a sterilized and disposable delivery system (i.e. bottles, corundum powder, tubing and hand piece) in order to perform a clean and safe operation, and avoiding completely cross contamination risks. The light and easy to use accessories, as well as the pre set levels of vacuum power make the Aesthipeel® System the ideal solution for superficial and medium peeling procedures.

Pre-Packed, pre-sterilized corundum crystals are the standards delivery kit that comes up with the machine.

Mattioli Engineering is specialized in manufacturing Microdermabrasion Systems since 1991.

The Company works world wide through direct operations and an International Distributors network.

Mattioli Engineering is ISO 9002 certified and GMP inspected and compliant Company.

ACCESSORIES AND DISPOSABLES

*Pre-Packed, Pre-Sterilized,
disposable delivery Kit,
accessories and corundum
30000285 Corundum
bottle set
30010015 Disposable
Tubing kit

TECHNICAL SPECIFICATIONS

POWER SUPPLY:

Supply Voltage: 110 and 220
Volts, single phase

Frequency : 50/60 Hz

Power absorption : 200 VA

Fuses: 2 x 2 AT at 110V, 60Hz
2 x 1 AT at 220V, 50 Hz

Class (according to IEC 601-1): 1
type BF

PERFORMANCES:

Suction power: from 0.2 to 0.65
bar (at sea level)

Abrading media:

High purity medical grade
corundum powder

PHYSICAL:

Dimension : 44x30x17,5 cm

Weight 17,6 pounds, 8 kg

STERILIZATION

Sterilization is of paramount importance
when the operator is dealing with
different Patients and skin conditions.

Cross Contaminations and debris
residua may affect the patient if the
microdermabrasion is not perfectly
cleaned and Sterile.

Sterilized disposables make sure
that nothing will happen to the
patient and to the operator at all.

Only Mattioli Engineering
guarantees safe and sterile operations
thru its disposable accessories and
consumables.
